

ABSTRACT OF THE DISCLOSURE

The present invention relates to a compound of formula (I), or a pharmaceutically acceptable salt thereof, wherein Z is OR¹ or NR¹R² wherein each of R¹ and R² is independently H, or a hydrocarbyl group; X is an alkylene, alkenylene, or alkynylene group, each of which may be optionally substituted by one or more substituents selected from alkyl, COOH, CO₂-alkyl, alkenyl, CN, NH₂, hydroxy, halo, alkoxy, CF₃ and nitro; Y is a polar functional group selected from OH, NO₂, CN, COR³, COOR³, NR³R⁴, CONR³R⁴, SO₃H, SO₂-R³, SO₂NR³R⁴ and CF₃, where each of R³ and R⁴ is independently H or a hydrocarbyl group; A is an aryl or heteroaryl group, each of which may be optionally substituted; and B is (CH₂)_n where n is 0, 1, 2, 3, 4 or 5; with the proviso that: (i) when A is phenyl, n is 0, and Z is OH, X-Y is other than *meta*-C≡C-(CH₂)₂CO₂H, *meta*-C≡C-(CH₂)₂OH, *meta*-C≡C-(CH₂)₂CO₂Me, *meta*-(CH₂)₄CO₂H, *ortho*-CH₂CO₂H, *ortho*-(CH₂)₂CO₂H and *ortho*-(CH₂)₄CO₂H; and (ii) when A is phenyl, n is 0, and Z is OMe, X-Y is other than *meta*-C≡C-(CH₂)₄OH. Further aspects of the invention relate to the use of such compounds in the preparation of a medicament for the treatment of a muscular disorder, a gastrointestinal disorder, or for controlling spasticity or tremors.
